

ELECTIONS DIVISION

2005-2006

ANNUAL REPORT

Washington
Secretary of State
SAM REED

Message from the Secretary of State

As Secretary of State, there are no greater responsibilities than managing accessible, fair, and accurate elections, and building faith and trust in democracy.

My vision for the future is an open and accessible democracy that encourages a strong turnout, enfranchises voters, promotes an informed electorate, and ensures that every vote cast is authentic and legal. Our success depends on the performance of lawmakers and elections officials, as well as our partnership with you, the voting public.

As elections administrators, we are accountable for fair, transparent elections, and a voting environment accessible to all citizens, including those with disabilities. We have a clear responsibility to encourage people to exercise their voting privileges through our own education campaigns, our partners in the media, schools, and citizen activist groups. We must also encourage participation through a process that meets the current needs of today's families, the way voting by mail fits the lifestyle of the 21st Century.

We can enfranchise more voters by reaching out to interest groups, and, in particular, to our young

people, who remain under-represented in elections. The turnout of our least participatory group of the voting public can be improved dramatically with civic education and encouragement at home.

We can introduce more citizens to the voting process by providing clear and current information about the elections process itself, and the issues and candidates that shape each of our lives. This information is also the basis for a well-informed electorate.

Finally, we must never let up on our efforts to improve the integrity of Washington's democracy. Public trust depends on it. Accurate voter registration rolls and uniform standards across the state in the conduct of elections are two critical pieces of the elections puzzle.

We are fortunate to have an elections process that empowers citizens and belongs to the public. Our decision to exercise our right to vote and strengthen our democracy rests entirely in our hands.

SAM REED,
Secretary of State

Executive Summary

Nick Handy
Director of Elections

The 2004 Governor's race brought dramatic changes to Washington State elections. Voters asked for higher standards in ballot accountability, voter registration, voter identification and accessibility.

Washington's elections administrators spent 2005 and 2006 implementing the many reform measures mandated by federal and state lawmakers.

The 2005 Legislative Session produced 12 elections reform bills directly resulting from the 2004 Governor's race. The 2006 session yielded five more. Additionally, many critical provisions of the Help America Vote Act passed by Congress in 2002 became effective in 2005 and 2006.

As a result of these elections reform measures, the Elections Division of the Office of the Secretary of State adopted 351 new or amended regulations in 2005 and 2006 to comply with state and federal law.

One of the most significant reforms involved launching Washington's voter registration database on January 1, 2006. The new database combined 39 separate county databases into one unified statewide database administered by the Office of the Secretary of State.

The new centralized database allowed Washington State to remove thousands of felons, as well as duplicate and deceased voter records, from the rolls.

Another significant federal reform required that every polling place in America provide a Disability Access Voting Unit for federal elections in 2006. Accordingly, each county purchased and made available Disability Access Voting Units for the 2006 elections. This enabled many Washington citizens to vote privately and independently for the first time in their lives.

Numerous actions were taken to improve ballot accountability following the 2004 Governor's race. These measures included ballot tracking systems, detailed reconciliation reports, increased training and more staff.

One of the most dramatic elections changes occurred when the 2005 Legislature authorized vote by mail for all counties. In two years, Washington moved from five vote by mail counties to 36 counties with confirmed or announced plans to implement vote by mail.

In the 2006 fall elections, 90 percent of Washington voters submitted their ballots by mail. At remaining polling places, new ID requirements were well received by Washington voters.

The many elections reform measures implemented since the 2004 Governor's race are designed to facilitate the core mission of the Elections Division: ensuring accessible, accurate and fair elections in Washington State.

Voter Education and Outreach

The most significant long-term goal of the Voter Education and Outreach team is to form a Voter Outreach Network throughout the state. The Office of the Secretary of State values public elections and voting education and recognizes that state and county staff cannot do the job alone.

Statewide Voter Outreach Network

By initiating dynamic and collaborative partnerships with interested individuals and organizations, the Office of the Secretary of State and the 39 county elections departments can depend on dedicated volunteers to distribute accurate information and inspire their own communities to vote.

Communicating with Partners

To assist with the dissemination of consistent, accurate information about elections to voters, the Voter Education and Outreach team created templates for brochures, posters and other printed

The Voter Education and Outreach team is focusing on partnerships with:

- Cultural communities
 - Student groups
 - Disabilities communities
 - Civic groups
 - Military organizations
 - Corporations
-

materials and offered these templates to the counties. The state purchased Adobe Professional software for 11 counties through a HAVA grant so they can now localize these state elections materials by adding a county logo and county contact information to the templates. The counties can then print the publications on their own and take credit for disseminating professionally-produced publications.

An electronic newsletter is distributed periodically via email to keep all elections administrators aware of significant happenings in the Elections Division of the Office of the Secretary of State and to highlight successful outreach ideas in one county that might be adopted by other counties or by their Voter Outreach Network partner groups.

Reaching Out to Youth

Youth voter education and outreach is a consistent priority. Multiple programs target youth civic engagement, voter registration and voting.

College Civics Committee

The College Civics Committee encourages student civic participation and peer education.

All Washington State institutions of higher education were invited to participate in the

program. In the 2005-2006 school year, more than 20 schools, hundreds of students and several County Auditors took part in a successful College Civics Week. In the 2006-2007 school year, 35 colleges agreed to participate in the program.

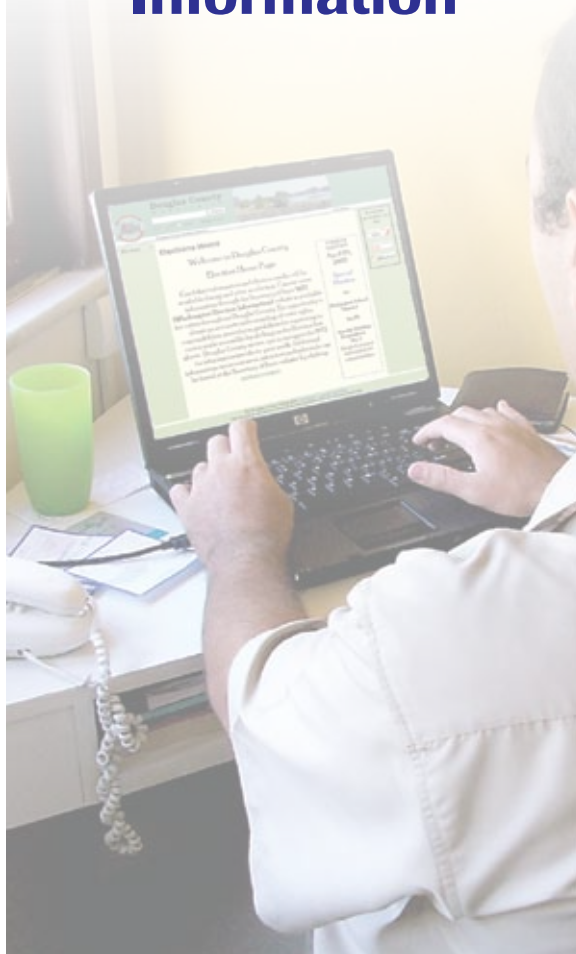

Student/Parent Mock Election

The Student/Parent Mock Election is an opportunity for students to learn about voting and the elections process at an early age. Despite 2006 being a mid-term election year, more than 2,500 students participated in a Mock General Election, besting by 1,100 participants the level of participation in the 2004 Presidential Election year.

18th Birthday Mailer

Voter Education and Outreach assisted Voter Registration Services with revamping the 18th Birthday Mailer program from its once-a-year mailing during even years, to a mailing that reaches young people turning 18 years old within a month of their birthday. The mailer includes a birthday greeting and a message from the Secretary of State about democracy and voting rights. The mailer includes a pre-filled, pre-addressed, postage-paid voter registration form. Now that a firm process is in place, Voter Registration Services will continue to maintain the program. Voter Education and Outreach will use information provided by the program to mail reminder postcards to eighteen-year-olds who register through the program but do not vote in the primary. This program is an example of how Outreach assists other workgroups within the division.

Washington Election Information

The Washington Election Information (WEI) system is a web publishing solution made available in full or separate pieces to all 39 county elections departments by the Office of the Secretary of State. Each county chooses how extensively it will use the WEI, ranging from creating a full-featured web presence where none existed before to enhancing an existing website.

The WEI gives all counties in Washington State the ability to publish accurate and timely elections-related content to a website that can be accessed by all citizens. Many portions of the WEI are translated into Spanish and Chinese and some portions are translated into additional languages. The WEI also has a text mode that makes it easier for persons with disabilities to have the web pages read to them using computer software and speakers.

When fully developed, the WEI will allow counties to publish lists of candidates who have filed for offices in an upcoming election, publish candidate photos and statements, and report the results of elections at every level of government.

The WEI will allow counties to publish locations of ballot drop boxes and polling places to help voters return their ballots on time and use Disability Access Voting Units if needed.

Each county is able to build and maintain its WEI website with an individual look and feel that reflects that county's chosen colors, fonts and imagery while displaying content provided by the Office of the Secretary of State. For example, voter registration information and forms provided by the state can be presented as text on a web page using the county's fonts, colors and imagery so that it does not look any different than a page created by the County Council or the County Assessor.

New pages specific to each county can be created using basic word processor formatting tools found in Microsoft Word. Images and PDF documents relevant to each county can be added to the pages for download by citizens.

In short, the WEI is a valuable voter education and outreach tool that will improve access to elections-related information for all Washington State citizens.

Elections Legislation

The Legislature passed an unprecedented amount of elections legislation in both 2005 and 2006.

2005

Paper Records

The Legislature passed a law requiring all electronic voting equipment to produce a paper record that may be reviewed by the voter before the ballot is cast. This gives the voter a chance to double-check a ballot before casting it, and it gives county elections departments a printed record to review in the case of recounts.

Vote by Mail

The Legislature authorized counties to conduct elections entirely by mail. The legislation requires that the decision be made jointly between the County Auditor and the County Commission or Council. By the 2006 General Election, 34 of the 39 counties in Washington were conducting elections entirely by mail. Many counties experienced increases in voter participation in the special elections and the Primary. The decision to conduct elections by mail rather than at poll sites has streamlined elections operations and reduced equipment costs. Voters in poll-site counties continue to vote absentee in large numbers.

ID at the Polls

The Legislature passed a number of elections reform measures as a result of the 2004 Governor's race. Among the changes for voters was a new

requirement that voters voting at the polls show identification. Among the changes for elections administrators was a requirement that the county elections departments produce ballot reconciliation reports at the time the election is certified and 30 days after the election is certified.

2006

Election Dates

The Legislature passed a law that changes the date of the primary and other election dates and deadlines. Effective in 2007, the date of the primary is moved from the third Tuesday in September to the third Tuesday in August to allow more time to conduct the primary, and prepare for the general election. Prior to this legislation, Washington had one of the latest primaries in the country.

Disability Access Voting Units

To better serve voters with disabilities, the Legislature required that Disability Access Voting Units be available 20 days prior to Election Day. This time period corresponds to the period that mail-in ballots are available to voters.

Voter Challenges

An extraordinary number of voter challenges were filed in King County in October 2005. This triggered legislation in 2006 that changed the process for challenging a voter's registration and required the challenger to provide a factual basis for the challenge.

Elections Litigation

The Office of the Secretary of State participated in six significant lawsuits in 2005 and 2006. This is in addition to the May 2005 trial contesting the 2004 Governor's race.

Challenging Initiatives Prior to the Election

In *Coppernoll v. Reed*, 155 Wn.2d 290 (2005), issued in September 2005, the State Supreme Court reiterated that opponents of an initiative may not challenge the substantive constitutionality of the initiative prior to the public vote. The court concluded that such challenges are premature since the measure has not yet become law.

The Referendum Process

The Washington State Constitution prohibits a referendum on laws that may be necessary for the immediate preservation of the public peace, health or safety, or support of the State government and its existing institutions. The Legislature periodically declares that certain legislation meets this test, which allows the legislation to take effect immediately and prevents the legislation from being subject to referendum. In *Washington State Farm Bureau Federation v. Reed*, 154 Wn.2d 668 (2005), the State Supreme Court reiterated a long-standing rule that the Secretary of State and the courts cannot second guess this legislative finding and subject the legislation to a referendum.

The Top Two Primary

Approved by the people in November 2004, Initiative 872 created a new primary system in which the two candidates in each race who receive the most votes advance to the general election, regardless of political party affiliation. In May 2005, Washington's Republican, Democratic and Libertarian parties challenged the constitutionality of I-872 in *Washington State Republican Party v. Logan*, 377 F. Supp. 2d 907 (W.D. Wash. 2005). The Washington State Grange intervened in the litigation as sponsors of the initiative. In July 2005, the United States District Court for the Western District of Washington ruled that I-872 violated the political parties' right of association and issued a permanent injunction prohibiting use of the new primary. Washington reverted to the Montana-style Pick-a-Party Primary used in 2004. In August 2006, the Ninth Circuit Court of Appeals affirmed the District Court ruling in *Washington State Republican Party v. Washington*, 460 F.3d 1108 (9th Cir. 2006). In February 2007, the United States Supreme Court granted the petitions for writ of certiorari filed by the State and the Washington State Grange in *Washington v. Washington State Republican Party*, 127 S. Ct. 1373 (2007). Oral argument before the United States Supreme Court is scheduled for October 2007.

Verifying Identity in Voter Registration

In January 2006, Washington launched the statewide voter registration database, as required

Elections Litigation

by the federal Help America Vote Act (HAVA). Washington interpreted HAVA as requiring an applicant's identity be verified with the State Department of Licensing, the Social Security Administration or other means before the applicant could be registered. In May 2006, organizations that conduct voter registration drives challenged Washington's procedures as violating HAVA, the federal Voting Rights Act and the U.S. Constitution. In July 2006, in *Washington Association of Churches v. State*, No. CV-06-0726-RSM (W.D. Wash. 2006), the United States District Court for the Western District of Washington ruled in favor of the plaintiffs. The court ordered the State to provisionally register applicants even if identity had not yet been confirmed. However, the voter's ballot will not be counted until the voter provides adequate identification.

Restoration of Voting Rights for Felons

State law requires a felon to complete all requirements of a sentence before the right to vote may be restored. This includes satisfying all legal financial obligations, such as fines, restitution, court costs, etc. In *Madison v. State*, No. 78598-

8, a group of convicted felons challenged as unconstitutional the requirement that all legal financial obligations be paid before the right to vote can be restored. King County Superior Court ruled in favor of the plaintiffs in March 2006, finding that the State cannot disenfranchise felons who have satisfied the felony sentence except for the legal financial obligations. Attorney General Rob McKenna argued the appeal before the State Supreme Court in June 2006, No. 78598-8. The Supreme Court has not yet issued an opinion.

Disenfranchisement of Convicted Felons

The Washington State Constitution and State law require that convicted felons lose the right to vote until the right is restored. In a case originally filed in 1996, *Farrakhan v. Gregoire*, No. CV-96-076-RHW (E.D. Wash. 2006), a group of felons challenged Washington's felon disenfranchisement law as discriminatory on account of race, violating the federal Voting Rights Act. The U.S. District Court for the Eastern District of Washington ruled in favor of the State in July 2006. The case is currently on appeal before the Ninth Circuit Court of Appeals.

Certification and Training

The Certification and Training Program administers an Elections Administration and Certification Program. Each county in the state of Washington must have at least two certified elections administrators on staff. Certification is achieved after attending a two day class, passing a written test, acquiring an additional 40 hours of training, and working as an elections administrator for two years. Eighteen hours of training per year are required to maintain certification.

The Certification and Training program also reviews each county's elections procedures at least once every three years. Reviews are done in conjunction with an election and a written report is produced. Additionally, special reviews must be conducted whenever a recount is likely in a legislative or statewide race.

Other areas Certification and Training oversees are candidate filing, Clearinghouses and development of Washington Administrative Code rules.

The Certification and Training Program was enhanced by the Legislature in 2005, increasing the number of elections specialists from three to six.

With the increase in staff, training and development classes have increased as well. The program conducts trainings for county elections administrators throughout the year, about once a month, at times that do not interfere with the business of conducting elections. In addition to providing training for elections administrators, training is also provided for elections observers and county canvassing board members.

Since 2002, several hundred state law and rule changes have been adopted. The Certification and Training Program plays an integral role in educating and assisting the counties in incorporating the new changes into their administration of elections.

On a case-by-case basis, the Certification and Training team provides on-site training for county elections administrators. Such training is used when a new administrator is hired and must conduct elections before they can attend regularly scheduled trainings.

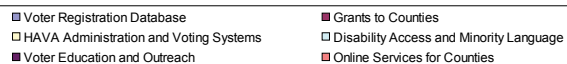

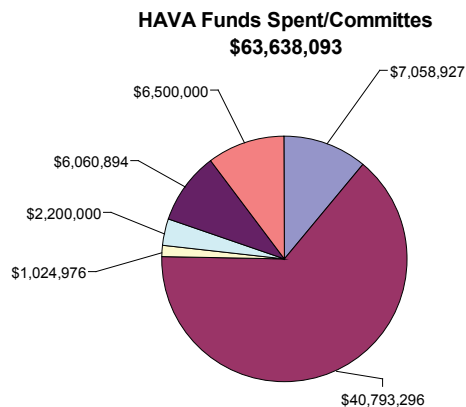

Each Certification and Training staff member is assigned specific counties with whom to develop relationships. Knowing the needs and issues of individual counties assists in the development of training opportunities.

The Certification and Training Program has been proactive in assisting counties with areas affecting elections administration. An "Observer's Guide to Washington State Elections" was published to assist official political party observers. The guide provides a comprehensive, simplified narrative of how elections are conducted in Washington.

An additional publication, "Voter Intent: Statewide Standards on What is a Vote," was produced to provide consistent handling of ballots from county to county. The standards are used by county canvassing boards in determining the manner in which ballots with questionable marks are counted.

Help America Vote Act (HAVA)

The United States Congress passed the Help America Vote Act of 2002 (HAVA) in response to the 2000 Presidential General Election and the voting irregularities that occurred in Florida. The purpose of HAVA is to provide funds to states to improve elections administration and replace outdated voting systems, to create a new federal agency to serve as a clearinghouse for elections administration and to create minimum standards for states to follow in several key areas of elections administration.

Washington HAVA Administration

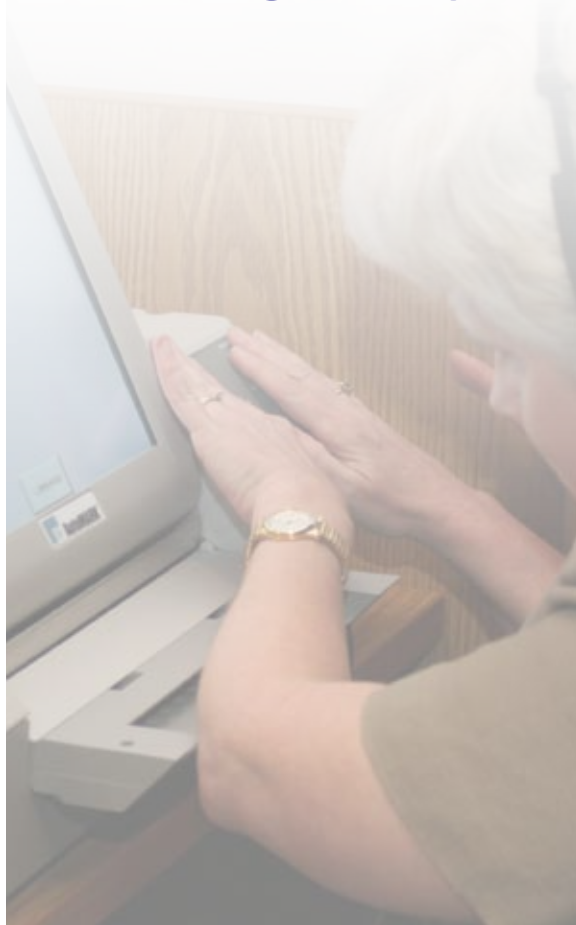

In 2005 and 2006, the Office of the Secretary of State continued to disburse and manage all state and federal funding received under HAVA. This included the creation and oversight of several grant cycles that were designed to accurately and fairly award money to counties across Washington State.

Other HAVA Developments

Other developments in Washington's HAVA administration include:

- Creating a complaint procedure as required by HAVA.
- Creating a grant program for Washington counties that specifically address the needs of voters with disabilities.
- Creating a County Education Fund that allows elections personnel to attend training that will help improve elections administration.
- Developing a comprehensive budget that details all federal funds received, disbursed, and interest earned.
- Developing and implementing a grant monitoring procedure as required by federal regulations.

Electronic Voting Policy

On January 1, 2006, Washington successfully met federal and state requirements to deploy at least one Disability Access Voting Unit at every poll site, including county courthouses in the case of vote by mail counties.

The Secretary of State made outreach and accessibility for voters top priority in 2006. The office supported legislation requiring counties to form accessibility boards to assist them in meeting the needs of their disabilities communities. Members of the disabilities communities were added to both county and state advisory boards.

As a result of Washington's large-scale conversion to vote by mail elections in 2006, a special need exists to bring Disability Access Voting Units to places where voters with disabilities live or can easily travel.

Most Disability Access Voting Units are electronic. To meet the new federal and state requirements, the Office of the Secretary of State adopted an electronic voting policy consisting of recommendations and rules pertaining to certification of voting systems, training of poll workers, procedures for equipment use and security practices.

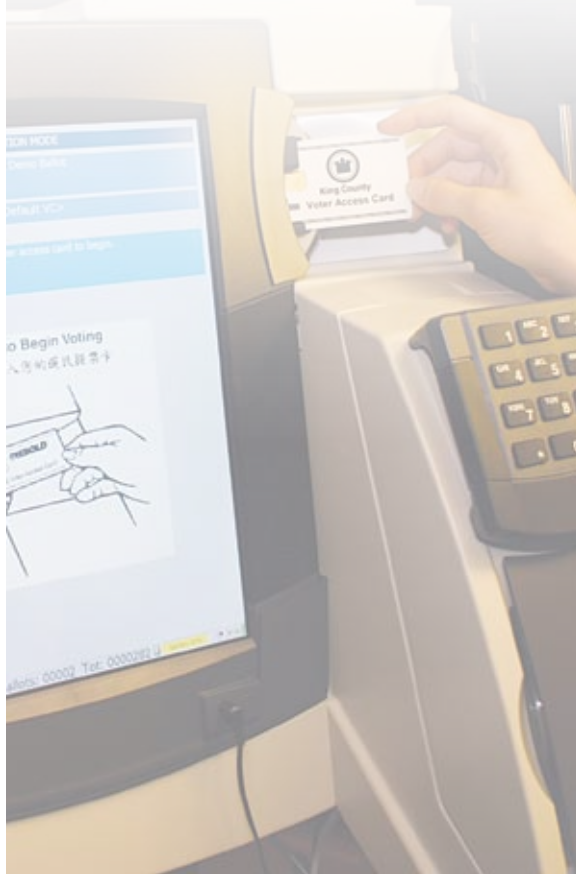

Under the policy, also enacted by the Legislature in 2005, the rules governing the certification of voting systems were updated to reflect new technology and the changing information needed to certify systems in Washington. The requirements for

voting systems to meet federal standards remain the same: no telephone, internet or wireless connections are allowed. Source code for electronic voting systems must be placed in the National Software Reference Library and be accessible by the Office of the Secretary of State for review when necessary. All electronic voting devices in Washington must have a voter verified paper audit trail.

Security remains the number one concern regarding electronic voting devices. In deploying an electronic voting system, the counties are required to have a technical security plan published and publicly available. The Office of the Secretary of State has established a County Voting Systems Advisory Committee to provide advice on voting systems best practices. The office will begin conducting reviews of voting systems and county security plans in 2007 to ensure that all systems meet the requirements of state certification and are deployed securely.

In 2006, Nick Handy, Director of Elections for the Secretary of State, served on the National Standards Board, participating in many meetings aimed at identifying the needs for voting system standards. Paul Miller, Voting Systems Manager, received an appointment to the Technical Guidelines Development Committee (TGDC) from the National Association of State Election Directors. The TGDC is a committee established by the Elections Assistance Commission and works with the National Institute of Standards and Technology to define core requirements for voting systems nationally.

Voting Systems and Equipment Certification

All voting systems used in Washington State counties are tested and certified at both the federal and state levels. The Office of the Secretary of State is responsible for certifying that these systems meet all state statutory requirements.

The most challenging issue for the Voting Systems Certification program in 2006 was the deployment of Disability Access Voting Units, required by the Help America Vote Act of 2002.

From December 2005 to April 2006, all four vendors with systems in Washington – Election Systems & Software, Diebold, Hart InterCivic, and Sequoia – brought new systems to Washington for testing and certification before the Voting Systems Certification Review Board, a new board comprised of members of the public. Every county in the state had new equipment and software installed before the 2006 General Election.

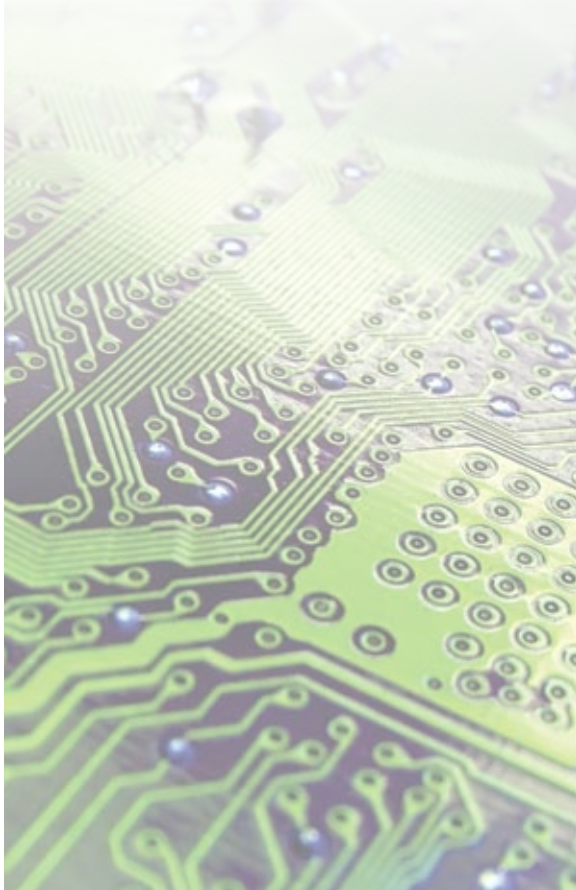

With logistical support from the Office of the Secretary of State's Certification and Training Program, vendors provided required training to the

counties in July 2006. Training focused specifically on the 2006 Pick-a-Party Primary. Approximately 20 counties used a consolidated ballot option for the first time in 2006.

Every county successfully used their Disability Access Voting Units, either in the first 2006 Federal Election or prior. The vendors kept the Office of the Secretary of State informed of their progress installing the new systems and in one case, the Certification and Training team took a proactive role in orchestrating a vendor's resources to ensure a successful election in this state.

Significant policy issues that arose from the use of Disability Access Voting Units in the 2006 fall elections included protecting the privacy of voters during the 4 percent audit of the voter verified paper audit trails (VVPAT), and handling missing information on the VVPAT (due to paper jam) during a manual recount. These issues were resolved with the assistance of a newly formed county Voting Systems Advisory Committee.

Voter Registration Database (VRDB)

Voter Registration in Washington State changed dramatically with the deployment of the first statewide voter registration database (VRDB) on January 1, 2006. The design of the database allows counties to retain their local databases and data entry processes, but new programming permits these local databases to talk to the state database in near real time.

Washington State's VRDB design was so successful that it was adopted by New York State in 2006.

Initial cleanup of voter registration records began in January when more than 3.7 million records were loaded into the new database. Comparing all county records filed prior to 2006, staff identified 32,383 potential duplicates and 5,156 potentially deceased voters statewide.

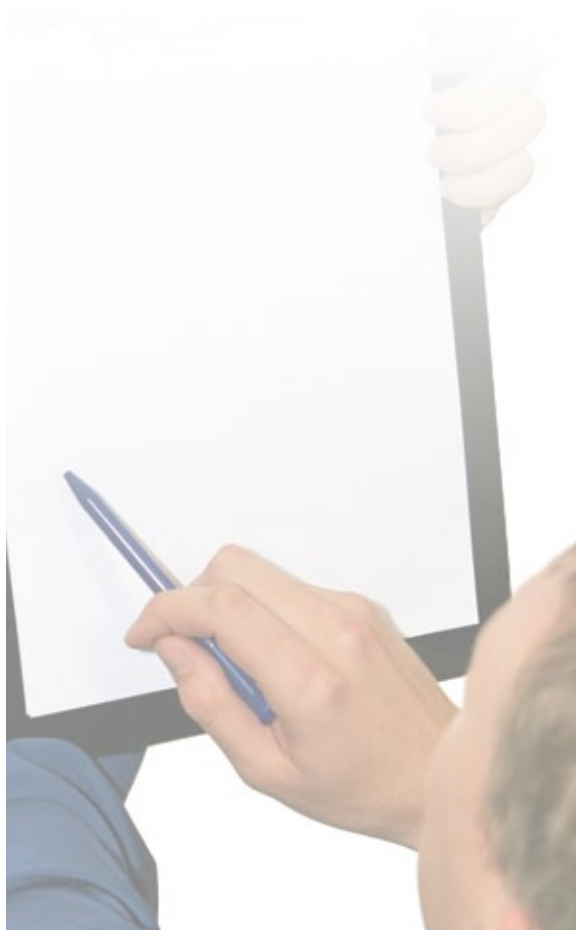

Monthly and quarterly comparisons were made throughout 2006 using other state agency databases, as required by law. Each month, the numbers of ineligible voters decreased and reached a normal maintenance level by the end of the year.

Each record identified as a potential duplicate, deceased or felon registration was thoroughly researched, including the comparison of signatures, to determine whether to cancel the record or not.

By December of 2006, 39,814 duplicates, 40,105 deceased, and 4,500 felons' registrations were cancelled. Additionally, 91,954 active and inactive registrations were cancelled as voters moved out of state. The total cancelled was 176,373.

The statewide database is managed by Voter Registration Services, which processed and sent more than 200,000 registration forms to the county elections departments in 2006.

Initiatives and Referenda

In 2005 – 2006, Initiatives to the People and Initiatives to the Legislature required 224,880 valid signatures of registered Washington voters to qualify for the ballot. Referendum Measures required 112,440 valid signatures of registered Washington voters to qualify for the ballot.

Fifty-four Initiatives to the People were filed in 2005 - 2006. Seven initiative sponsors submitted signatures and six initiatives qualified for the ballot using the statistical random method of verification. A full check of more than 226,000 signatures verified that the one initiative failing a random check did not qualify for the ballot. The six initiatives that did qualify are listed below:

Initiative Measure 900

This measure would direct the State Auditor to conduct performance audits of state and local governments and dedicate 0.16 percent of the state's portion of Sales and Use Tax collections to fund

these audits. This initiative was filed January 10, 2005 by Tim Eyman, Leo J. Fagan and M. J. Fagan.

Initiative Measure 901

This measure would prohibit smoking in buildings and vehicles open to the public and places of employment, including areas within 25 feet of doorways and ventilation openings unless a lesser distance is approved. This initiative was filed January 10, 2005 by Christopher Covert-Bowlds.

Initiative Measure 912

This measure would repeal a motor vehicle fuel tax rate increase enacted by the 2005 session of the Legislature for statewide transportation purposes. The 2005 enactment provides that the motor vehicle fuel tax rate would increase by 3 cents per gallon in July 2005, by 3 cents per gallon more in 2006, by 2 cents per gallon more in 2007 and by 1.5 cents per gallon more in 2008. This initiative was filed May 12, 2005 by Jane Milhans.

6	Maria Mendoza	Maria Mendoza
7	Aaron Goldstein	Aaron Goldstein
8	Henry Walker	Henry Walker
9	Pauline Stevenson	Pauline Stevenson
10		

VOTER REGISTRATION SERVICES

Initiative Measure 920

This measure would repeal Washington's state laws imposing a tax, currently dedicated to the Education Legacy Trust Fund, on transfers of estates of persons dying on or after the effective date of this measure. This initiative was filed January 9, 2006 by Dennis Falk.

Initiative Measure 933

This measure would require compensation when government regulation damages the use or value of private property, forbid regulations that prohibit existing legal uses of private property and provide exceptions or payments. This initiative was filed January 24, 2006 by Daniel W. Wood.

Initiative Measure 937

This measure would require investor-owned and consumer-owned utilities with 25,000 or more customers to meet designated targets for energy

conservation, including cogeneration as defined, and use of eligible renewable energy resources. Renewable energy resource targets may be met by designated investment levels, including energy resource credits. Utilities not meeting conservation and renewable energy resource targets would pay penalties to the state, to be used for purchase of renewable energy credits or certain energy conservation purposes. This initiative was filed January 25, 2006 by Robert Jay Pregulman.

Thirty-nine Initiatives to the Legislature were filed in 2005 - 2006. Two initiative sponsors submitted signatures and their initiatives were referred to the Legislature. Both initiatives appeared on the General Election ballot in November 2006.

Initiative Measure 330

This measure would change laws governing claims for negligent health care, including

restricting non-economic damages to \$350,000 (with exception), shortening time limits for filing cases, limiting repayments to insurers and limiting claimants' attorney fees. This initiative was filed June 17, 2004 by Dr. Jeffrey B. Collins.

Initiative Measure 336

This measure would require notices and hearings on malpractice insurance rate increases, establish a supplemental malpractice insurance program, require medical license revocation proceedings after three malpractice incidents and limit numbers of expert witnesses in lawsuits. This initiative was filed August 30, 2004 by Lawrence B. Shannon.

Eight Referendum Measures were filed in 2005 - 2006. Three measures were withdrawn by the sponsors, three sponsors submitted no signatures, and two measures were rejected because of the emergency clause in the legislation.

2006 General Election Voter Turnout by County

2006 GENERAL ELECTION
DEMOGRAPHIC STATISTICS

Washington Voters

The "median," active, registered voter in the 2006 Washington State General Election was a 45-54 year old woman living in an urban area. Women outnumber men in every age bracket of voter turnout. Urban voters constitute approximately 75 percent of registered voters in Washington State.
